Fifth-semester Information Systems student at Tarumanagara University with basic knowledge of programming, database management, and web and mobile application development. Familiar with programming languages and technologies such as C++, Java, SQL, HTML, CSS, and PHP. Understands the fundamentals of system requirements analysis, database design, and software development. Seeking an internship opportunity to apply academic knowledge, develop practical skills, gain professional experience, and contribute to information technology projects within an organization.

ACADEMIC PROJECTS

Web Development
Course Project
- Developed an academic website using PHP and a MySQL database to store and manage data.
- Created a travel website using HTML and CSS, focusing on page structure and user interface design.
- Connected a PHP-based academic website to a MySQL database to support data storage and management.

Software Development
Course Project
- Designed the user interface and system workflow using Figma based on user requirements.
- Implemented the UI/UX design into an application using programming languages.
- Designed a smart locker rental system concept featuring booking, locker access management, and QRIS payments.

Big Data
Course Project
- Processed and transformed annual weather data using Python.
- Performed statistical analysis on the dataset, including average calculations.
- Presented the analysis results through charts to improve understanding of data patterns and characteristics.

Object-Oriented Programming
Course Project
- Developed a web-based food storage inventory application using Java.
- Applied object-oriented programming principles to structure the program and implement its logic.
- Developed application functionalities to support food inventory management.

EDUCATION

Tarumanagara University **Aug 2024 - present**
Information Systems
GPA: 3.55/4.00

SKILLS

Technical Skills:
- Programming Languages: C++, Java, PHP, Dart
- Web Development: HTML, CSS
- Database Management: SQL, MySQL, phpMyAdmin
- Mobile Development: Flutter
- Data Processing & Analysis: Python
- UI/UX Design: Figma
- System Analysis & Design: Requirements Analysis, Flowcharting
- Office Tools: Microsoft Word, Microsoft Excel, PowerPoint

Non-Technical Skills: Analytical Thinking, Problem Solving, Teamwork, Time Management
